

# Module Handbook

Degree:	Bachelor of Arts (B.A.)
Subject:	Art in Social Contexts. Art Therapy
Heads of study programme:	Prof. Dr. Marc Schipper, Prof. Dr. Kathrin Seifert
PO-Version:	20182
Valid for Semester:	SoSe 2024
Version:	25.03.2024

- Requirement for the successful completion of studies within the standard prescribed period of study is adherence to the respective recommended semesters of a module.

- When multiple people are responsible for a module, the first-mentioned is responsible for the program

## Contents

KS-1: Artistic Foundations: Practice and Theory of Artistic Media	3
KS-2: Subject-specific foundations of art therapy	5
Interdisciplinary Project 1	7
Fundamental Studies 1	9
Interdisciplinary Project 2	11
Fundamental Studies 2	13
KS-3: Artistic practice and aesthetic strategies	15
KS-4: Approaches and concepts in art therapy	17
KS-5: Foundational Internship	19
KS-6: Artistic practice and projects	21
KS-7: Art Therapeutic Interventions and Setting Forms	23
KS-8: Specific fields of application, procedures and techniques in art therapy 1: Clinical applications	25
KS-9: Professional work experience	27
KS-10: Artistic mediation	29
Initiative study	33
KS-12: Bachelor thesis	35
Index	37

## Goal, Content and Literature in Module 2

### Goal

In Module KS 1 the students acquire important knowledge about the material and creative qualities of artistic media. Through experimenting with different artistic processes and techniques, they develop their artistic position. At the same time, they get to know fundamental terminology and can make quality assessments. Overall the module is aimed at acquiring fundamental practical artistic competences.

### Content

Students learn about and try out material and practical fundamentals of artistic media and their possibilities. In their artistic-experimental studies, students develop a workflow through artistic means in different areas and media, while mainly dealing with color, area, space, form, material, movement and time. The results are presented, reflected and discussed in plenaries, colloquia, and presentations. An interdisciplinary exchange takes place through co-teaching and tutoring.

### Note

The Basic Curriculum in semesters 1 and 2 includes nude and portrait drawing (see Module I – Initiative Studies).

## Goal, Content and Literature in Module 2

### Goal

In Module KS 2 the students get to know the technical foundation of relevant basic and related sciences. These also include current models of Health/Illness, as well as models of inclusion from the areas of health and social science, medicine and psychology. They gain basic knowledge of the structure and functioning of the biopsychological human configuration and its social integration, as well as the width and variety of the human course of development. They know different concepts and models related to age-specific development/ developmental disorders and are able to use these critically and distinctively.

### Content

Within this module the following content is conveyed:

- Historical development and state of Art Therapy as an inter- or transdisciplinary justified method (visual understanding, design/determinants of artistic and therapeutical processes, active factors, etc.)
- Concepts of health and illnesses especially based on biopsychological models, as well as based on the anthroposophical conception of man
- from the area of medicine: anatomical and physiological fundaments of the nervous system, the cardiovascular system, and the hormone system, while taking illnesses into account. Psychosomatic, complementary medicine as well as anthroposophical oriented aspects are given special consideration. Construction and function of the sensory organs, psychosomatic treatment plans based on et al. the salutogenesis
- from the area of psychology: specialized foundations of psychology, et al. selected development and disorder models in different stages of life et al. based on et al. neuro-behavioral, psychodynamic, systemic and anthroposophic perspectives
- from the area of Psychiatry and Psychotherapy: systematic introduction in the field of Psychiatry and Psychotherapy, as well as fundamental pathology regarding appearance, diagnostic and therapy
- Interdisciplinary foundation: developmental topics and tasks over the life span from a transdisciplinary and inclusive view (et al. developmental models and children drawings as well as childish expressions and communication, basics of the attachment theory and embodiment theory) with special consideration to systemically oriented and anthroposophically-oriented views

## Goal, Content and Literature in Module P1

### Goal

The students can autonomously work on a given task and present their results. They are able to justify their project experiences and reflect upon these. The students gain communicative competence through the artistic project work, which is reflected in the accompanying seminar. They learn about models of active listening and non-violent communication. They get to know feedback systems and learn how to use them. They possess basic abilities and knowledge of documentation and description of aesthetic processes and can present these in a portfolio as well as verbally.

### Content

The students start their studies with a project week, in which they work on a specific aesthetic task in teams. They are supervised and supported by teaching staff through co-teaching. Followed by an introduction into techniques of presentation and documentation, they create a portfolio. The students learn about the fundamentals of artistic research and its location in epistemology. They learn about participatory research approaches. Subject of the related theory-practice-seminars are models of feedback culture, non-violent communication, and active listening.

## Goal, Content and Literature in Module KS F1

### **Goal**

The students know the fundamentals of academic work and use this regarding the production of module examinations. They know the knowledge base of the fundamental, as well as the relational studies, which are relevant to their field. They particularly know the fundamentals of social and educational science as a chosen professional perspective. Consequently, they are able to use their scientific knowledge and reflect their professional orientation interdisciplinary. They get to know historical and current perspectives and positions of different disciplines and subjects, and can process these through concrete questioning. The overall goal of this module is the development of scientific competences, esp. sound reflection and communication capabilities.

### **Content**

In Modul F1 the fundamentals of academic work are taught, as well as different epistemologies and their application.

Apart from the obligatory seminars, the students can choose from a range of classes in basic as well as related studies, relevant to their field. Examples for seminars in the Studium

Fundamentale are: Art theoretically valid models of interpretation, Phenomenology of perception, Types of teaching and learning.

### **Literature:**

Will be announced in the seminars.

## Goal, Content and Literature in Module KS P2

### Goal

The students can apply their acquired artistic knowledge and skills to a specific artistic interdisciplinary project. They are able to work in groups with students from all study fields as well as plan, execute and present a free artistic, art therapeutic or work-related project (e.g. Theater in business establishments, Projects in a psychiatric ward, Art in public spaces or art institutions, Art therapy in clinics,.).

They can reflect on their artistic work concerning the contents of the project related seminars. They can offer different perspectives concerning their work.

They understand the basic steps of planning, executing and securing the results of projects. They have media competences at the interface between the arts and the sciences relevant to their studies.

In the artistic interdisciplinary projects and the following project forum, the students learn about problems and approaches during the planning and execution phase of projects in social contexts.

They form peer consulting groups and profit from different ideas, impulses, and experiences. The forum offers help during the ongoing project planning and executing. The students learn to counsel and support each other.

### Content

The students choose from different projects offered by teachers of the university in their area of research or plan their own interdisciplinary projects. The students plan their project with the help

of various artistic mediums and types. They are accompanied by various teachers through co-teaching. They describe and document their projects and reflect on these amid project-specific theory models and fundamental thoughts in project management.

The project forum included in the module, offers students and teachers a platform to exchange project related experiences in the various praxis fields of the involved areas of study.

## Goal, Content and Literature in Module KS F2

### **Goal:**

The students know the fundamentals of the social and educational science as a chosen professional perspective in their future occupational fields. They can reflect on their artistic and scientific experiences and knowledge. They can reflect on their professional orientation interdisciplinarily. They learn how to deal with artistic processes and the scientific sources relevant to their field of study and can work on a specific question.

### **Content:**

The focus of module F2 is on the advancement of scientifically justified reflection capability. Different scientific perspectives of the current society and fundamental problems of the human self-conception are being connected productively. The module serves the training of the reflection competences, related to aesthetic perception and the practice of power of judgment. It provides knowledge of the theoretical and methodical fundamentals of the arts and science beyond the borders of their particular discipline. It trains the interaction with complex communicative processes and leads to the acquirement of communicative competence in view of societal fields. Apart from the obligatory seminars, the students can choose from a range of classes in basic as well as related studies, relevant to their field of studies. Examples for seminars in the Fundamental Studies are: Art theoretically valid models of interpretation, Phenomenology of perception, Types of teaching and learning.

### **Literature:**

Will be announced in the seminars.

## Goal, Content and Literature in Module 3

### Goal

In module KS 3, the students gain extended knowledge in specific processes and techniques of artistic media. They can reflect and convey different aesthetic strategies and processes as well as their theoretical backgrounds in different contexts. They develop an understanding especially for intermedial work, for experimental, interactive and innovative concepts. The artistic expertise gained in this module results in an autonomous position and formulation as a basis for art-based therapeutic and paedagogical acting and communicating.

### Content

Through artistic work in the studio, practical abilities and theoretical knowledge is developed and conveyed. These are tried out and examined in regards to the development of one's artistic conception. The results are shown, reflected and discussed in small groups, colloquiums, and presentations. The mentoring of the students takes place in single as well as group conversations. The module exam is the result presentation of the module KS 3 (§ 10 und § 12.1.1 /PO).

## Goal, Content and Literature in Module 4

### Goal

In module KS 4 the students gain differentiated knowledge about schools of therapy-specific and general approaches, as well as interdisciplinary models in art therapy. They have knowledge and understanding of the state of art therapy in view of different fields of application. They have knowledge of different orientations, directions and requirements of art therapy in practice. They know concepts of justification for the use of different art materials in the therapeutic and pedagogical work. That contains models of art and process viewing as a requirement for the development and reflection of artistic-therapeutical work approaches. Through this, a deepened confrontation with theoretical positions of art therapy becomes possible, which is accompanied by a reflective self and external experience through artistic means and methodical exercises.

### Content

Within this module the following content is conveyed, partially through co-teaching:

- Different directions, approaches as well as transdisciplinary reference models in art therapy
- Art therapy in clinical as well as in (curative) educational and additional social fields, especially also in inclusive application fields
- Different concepts and models of work and process viewing (phenomenological, hermeneutical, anthroposophical, systematical, etc.)
- Artistic-therapeutical concepts for the work with children, youth and adults based on systemic oriented and anthroposophical concepts
- self-awareness through artistic media

## Goal, Content and Literature in Module 5

### Goal

As part of the Foundational internship, which can also be completed in the form of project work, the students gain abilities in using artistic methods and processes in social contexts and different therapeutical and pedagogical professional fields. They learn to design social processes through the means of art and to understand the meaning of their actions as an element of visual art. At the same time, they learn to connect with others through artistic means, as well as to encourage and guide artistic processes. The experiences and observations made are described and documented systematically, in reflected in guided intervision groups.

### Content

During the Foundational internship, the students are supported by a mentor. In addition, case supervision is offered. Furthermore, the module includes:

- Concepts, planning and execution of artistic-therapeutical work in different social professional fields and additional social contexts
- Forms of documentation (et al. case documentation, process documentation) and evaluation in the field of practice
- Foundational Internship/Project consisting of 150 hours

The students formulate their practical experiences, observations, and reflections in an internship report.

### Remarks

## Goal, Content and Literature in Module 6

### Goal

In this module, the students broaden their knowledge in the specific techniques and processes of artistic media. They can reflect upon different artistic strategies and processes in various contexts and against the background of social development and phenomena. They have the ability to independently develop, implement and convey intermedial tasks and experimental, interactive and innovative concepts. The gained abilities and competences lead to independent formulation and imagery as a basis for therapeutical and pedagogical acting. On that basis, artistic intervention and projects in public spaces can be designed and their importance for artistic-therapeutical acting can be reflected upon.

### Content

Based on the students' artwork, practical abilities and theoretical knowledge is developed and conveyed. These are tested and explored in regards to their artistic concept and the use of different artistic media as well as interventions. The results are shown, reflected and discussed in small groups, colloquiums, and presentations. The mentoring of the students takes place in single as well as group conversations. The module exam is the presentation of the module KS 3 (§ 10 und § 12.1.1 /PO). This includes a position paper on artistic stance and work.

## Goal, Content and Literature in Module 7

### Goal

In this module, the students extend their abilities to use artistic-therapeutical intervention methods in regards to the respective goals and indications in various settings (single, group, pair and family work). Here they can expand on their knowledge of either systematical-oriented or anthroposophically-founded methods and processes. The students know the diverse possibilities of expression and communication in artistic processes and their results, which are tried and reflected upon in reference to developed art therapeutical processes and methodical concepts. They gain technical, especially methodical and diagnostical competences and learn about the use of art therapeutical intervention and approaches in different practical settings. Accordingly, they can adopt a therapeutical attitude in the art therapy profession.

### Content

Within this module the following content is conveyed:

- Intervention methods, processes and techniques of art therapy in various settings (e.g. depth psychology, systematical – goal-oriented, resource-oriented, anthroposophical, etc.)
- foundations and practice-oriented aspects of the development of art therapy processes in various settings
- Integrative and especially also embodiment oriented methods and processes (e.g. Expressive Art Therapy)
- Special systemic-oriented as well as anthroposophical-oriented methods and processes in art therapy
- Diagnostical processes and projective Instruments for use in art therapy
- Personal experience with different artistic media

## Goal, Content and Literature in Module 8

### Goal

In Module KS 8 the students gain an extended knowledge about the future professional activity in the different scopes. They know the range of clinical care as well as the areas of health promotion and prevention, related classifications for filing and care for illnesses or promotion of health. They are familiar with the ethical, professional law and professional politic foundations. On that basis, they can develop (manualize) and describe interventions for specific target groups and indications, as well as derive application-oriented research questions. They are qualified to soundly and appropriately assess visual-artistic processes and their results, in the context of signs of disorder and potential for development. Overall the students acquire professional and research-related competences in this module.

### Content

The following content is included in this module:

- Base relational concepts and forms of dialogue in art therapy based on depth psychology, behavioral psychology, anthroposophical and systematic relationship models in consideration of gender perspectives, ethical and intercultural aspects.
- Application-oriented knowledge about types of relationship structures, relationship phenomena and group dynamic processes in art therapy
- Current status of art therapies in medical guidelines
- Art therapy in specific treatment situation (e.g. in acute treatment, inpatient, ambulant groups), in different indications and pathology (theory/practice seminars)
- Exemplary casework/ presentation of transfer possibilities of art therapeutical processes geared towards patient and professional related demands
- Ethical and legal foundations of art therapy or rather artistic therapies for various professions

## Goal, Content and Literature in Module 9

### **Goal:**

Within the vocational internship, the students can use the knowledge and field related competences gained in their studies. They expand in either systemically oriented or anthroposophically founded knowledge in various social, therapeutical and pedagogical areas of expertise. The internship can also be completed within a practical project. They can initiate, moderate and responsibly guide therapeutical processes while taking indication related, ethical and institutional aspects into account. The experiences and observations gained in the vocational internship can be described, systematically documented and evaluated by the students. They know and reflect the influences of their action as well as the influences of the specific setting. Furthermore, they can competently act in multi-professional teams and convey their discipline-specific knowledge.

### **Content:**

During the foundation internship, the students are supported by a mentor. In addition, case supervision is offered. Furthermore, the module includes:

- Preparation, implementation, documentation and evaluation of the internship or project
- Supervision of the course of cases and problem constellation as well as experience in design and moderation of art therapeutical processes and the professional role.
- Foundations of discussion strategies and speech formation
- Professional Internship/Project consisting of 300 hours

## Goal, Content and Literature in Module 10

### **Goal**

The students further develop the competences acquired in the modules KS 1, KS 3 and KS 6 independently and can design and realize a final presentation of their artistic work or a thematic exhibition. They are able to communicate and convey their work and presentation concepts confidently.

### **Content**

The students design and realize an artistic final presentation or thematic exhibition autonomously. The presentation can be related to various artistic, social or cultural contexts. The respective conception and realization of the work are to be defended openly within the school context. The mentoring of the students takes place in single and group settings, and in the form of a colloquium.

## Goal, Content and Literature in Module F3

### **Goal:**

The students know the fundamentals of the social and educational science as a chosen professional perspective on their future occupational fields. They can reflect on their artistic and scientific experiences and knowledge. They can reflect on their professional orientation interdisciplinarily. They learn how to deal with artistic processes and the scientific sources relevant to their field of study and can work on a specific question.

### **Content:**

The focus of module F3 is on the scientifically justified reflection capability. Different scientific perspectives of the current society and fundamental problems of the human self-conception are productively being connected. The module serves the training of the reflection competences, related to aesthetic perception and the practice of power of judgment. It provides knowledge of the theoretical and methodical fundamentals of the arts and science beyond the borders of their particular discipline. It trains the interaction with complex communicative processes and leads to the acquirement of communicative competence in view of societal fields. Apart from the obligatory seminars, the students can choose from a range of classes in basic as well as related studies, relevant for their field of studies. Examples for seminars in the Studium Fundamentale are: Art theoretically valid models of interpretation, Phenomenology of perception, Types of teaching and learning.

### **Literature:**

Will be announced in the seminars.

## Goal, Content and Literature in Module IS

### **Goal**

The module gives students the possibility to develop an individual profile in regards to their specific professional orientation. It promotes social commitment as well as student mobility by simplifying the creditability of credits earned abroad as well.

In the position forum, students get to know current artistic and scientific positions given the implementation in the Arts in Social Contexts. They learn about discipline-specific and interdisciplinary discourses and how to reflect upon these in regards to their professional field. Through that, the position forum offers insights into the self-organization of the studies.

The research forum enables the students to research and apply methods and approaches autonomously, in recourse to specific research questions, as they arise from professional practice modules and conceptional observations of the artistic and scientific final theses.

### **Content**

In the module, the courses from different areas are combined to profiled course sequels, which allows students who for example change their major to purposefully acquire competences in regards to enrolling in the Master program "Art and Theater in Social Contexts (M.A./M.F.A.). The position forum and research forum are also located within the module. The position forum takes place in the form of lectures and lecture series, which are complemented by discussion forums. The research forum offers a platform for the exchange of research perspectives from different disciplinary approaches.

Social credit points are awarded to students who are involved in community and university politics in the sense of service learning. They are awarded for social and voluntary commitment. Creditable activities are, for example, participation in student initiatives, representation of the student body in university committees, involvement in the AStA, supervision of exchange students or similar. Creditability is checked by the module coordinators. Remunerated activities cannot be credited.

### **Remarks**

The crediting of credit points acquired at other universities and competences acquired in other professional fields is possible.

### **Literature**

Will be announced in the seminars.

Note regarding the examination requirements in Module 12:  
**Applicability: KS**

## Goal, Content and Literature in Module 12

### **Goal**

The students are able to handle a specialized isolated topic or rather a relevant question and problem in accordance with scientific criteria. They can autonomously produce a scientifically based, methodically disclosed and practice related piece of work. It is advised to further scientifically pursue the knowledge and competences acquired during the studies, in regards to the chosen focus of systemically-oriented or anthroposophically founded art therapy.

### **Content**

The students work on a fundamental theoretical or application-oriented question from the context of their studies. They independently work on a topic while including scientific criteria. The bachelor thesis includes 30 pages.

### **Literature**

(Literature follows).
