gr: graded	WL: Workload	E: Elective
		O: Optional

Learning objectives in Module 1

Goal:

The students acquire practical and theoretical knowledge about material, creative and cultural features and backgrounds of different artistic media. They acquire fundamental knowledge regarding the practical artistic procedures and technical skills which are connected to the respective media. The students' own artistic intentions and experimental research serve as a starting point for developing independent artistic approaches. They acquire the skill to differentiate artistic terms both practically and theoretically and to evaluate the quality.

Content:

The material and media-specific foundations for artistic media as well as its possibilities are conveyed and tested. During their experimental researches with artistic means in the different areas and media the students develop a work flow in which colour, surface, space, form, material, movement and space are in the centre. The work results are presented regularly in work presentations and colloquiums, reflected upon and discussed. An interdisciplinary exchange takes place in the form of co-teaching and tutoring.

There are considerable amounts of theoretical parts in the theory – practice seminars in the specific course modules FK 1 till FK 7. The students in the foundation course of fine arts additionally participate in these.

Learning objectives in Module 3

Goal:

The students acquire further knowledge regarding specific artistic media techniques and procedures and achieve insight on how they compare in regard to material, concept and result. Different artistic strategies and procedures as well as their theoretical backgrounds and contexts are reflected upon. Inter-medial work as well as the understanding for experimental, inter-active and innovative concepts are supported. The acquired skills build the foundation for independent phrasing and pictorial language.

Content:

Both practical and theoretical skills and knowledge are acquired and conveyed by means of the students' artistic work. These are tested and questioned and examined in regard to their own artistic work which helps them develop individual artistic strategies and procedures which they can then apply to their own artistic work. The students' intentions and artistic work serve thereby as a starting point. The work results are presented regularly in work presentations and colloquiums, reflected upon and discussed. The students' accompaniment takes place in the form of one to one talks and group discussions.

There are a considerable number of theoretical parts in the theory – practice seminars in the specific course modules FK 1 till FK 7. The students in the foundation course of fine arts participate additionally in these.

Learning objectives in Module 5

Goal:

The students are provided with the skills to independently develop and implement theoretical and practical artistic concepts, especially taking inter-disciplinary procedures into consideration. They are equipped with knowledge regarding historical pictorial forms and current discussions about artistic work. They possess a deeper understanding in both a social as well as a genuine cultural context. Specific areas of specialisation are not to be understood so much as limitations but rather as basic units.

Content:

Based on the respective artistic intentions and work the students develop the ability to create and implement artistic concepts in one or more artistic disciplines or inter-medial procedures. They acquire the therefore essential practical and theoretical skills and an intensive examination of the technical and artistic problems regarding the respective media takes place. The work results are presented regularly in work presentations and colloquiums, reflected upon and discussed. The students' accompaniment takes place in the form of one to one talks and group discussions.

There are a considerable number of theoretical parts in the theory – practice seminars in the specific course modules FK 1 till FK 7. The students in the foundation course of fine arts participate additionally in these.

Notes on the examination results in Module 7: You have the possibility to enrol in one of the elective subject. You can thereby acquire extra credit points. As a general rule the elective subjects can be assigned to: graphic procedures, text, image, reproduction and photography, compulsory elective subject as a two-dimensional procedure and the elective subjects; art in a public space, performance and time based media, compulsory elective subject as a three dimensional procedure.

Learning objectives in Module 7

Goal:

The students independently develop autonomous artistic positions in one or more artistic disciplines. They strengthen the own position and exhibit a competent behaviour when examining intent and result. The works are presented to the public.

Content:

The students' artistic work is accompanied and reflected upon practically and theoretically. The work results are presented in work presentations and colloquiums, discussed and critically examined in reference to historical and time-related positions. A preparation for the final presentation in the framework of the bachelor thesis takes place. The students' accompaniment takes place in the form of one to one talks and group discussions.

There are a considerable number of theoretical parts in the theory – practice seminars in the specific course modules FK 1 till FK 7. The students in the foundation course of fine arts participate additionally in these.

Learning objectives in Module 8

Goal:

The students acquire medial skills and contentual competencies regarding artistic processes dealing with the "artistic operation system". Strategies and methods are reflected upon, concerning competent claims and the following consequences of their own artistic production in the professional practice. The students procure fundamental skills in dealing with their own entrepreneurial independence.

Content:

The students acquire practical and theoretical skills regarding the "artistic operation system" (Sponsorships, exhibitions, committees and institutions their structure). They broach the issue of the build-up of positions and the assessment of application qualifications. They become familiar with issues such as publication, media literacy and networks and furthermore become acquainted to their practical application. They acquire fundamental knowledge regarding entrepreneurial independence (tax law, copyright, code of civil law, social legislation/artists' social insurance/general business management, project management, exhibition technique, acquisition, advertisement, logistics, organisation)

Learning objectives in Module 9

Goal:

The students show the competence they have learnt throughout their studies, to independently implement, reflect critically and document an artistic project work in a given period of time, by means of a presentation.

Content:

The students conceptualise and implement an artistic project work. The project can be carried out in different artistic, social or cultural contexts. It can be done in a team; however it has to be indicated which student was responsible for the respective parts of the work. The concept and implementation of the work are secured and documented both in written form and in pictures. The work is completed by means of a public presentation, a documentation and a colloquium.
